

Plain Bob Minimus

Purpose

Plain Bob Minimus enables ringers to learn three of the basic pieces of work of Plain Bob Doubles.

As it is only 24 changes long, the work comes round quickly, so there are plenty of chances to perfect them.

New skills include dodging 3-4 up and down whilst hunting and making seconds over the treble.

Ringing Plain Bob Minimus

The treble plain hunts.

When the treble takes you off the lead, make seconds and lead again.

If the treble is passed at the back, dodge 3-4 down.

If the treble is passed in second place, dodge 3-4 up.

The dodges in 3-4 up and 3-4 down are with different bells.
